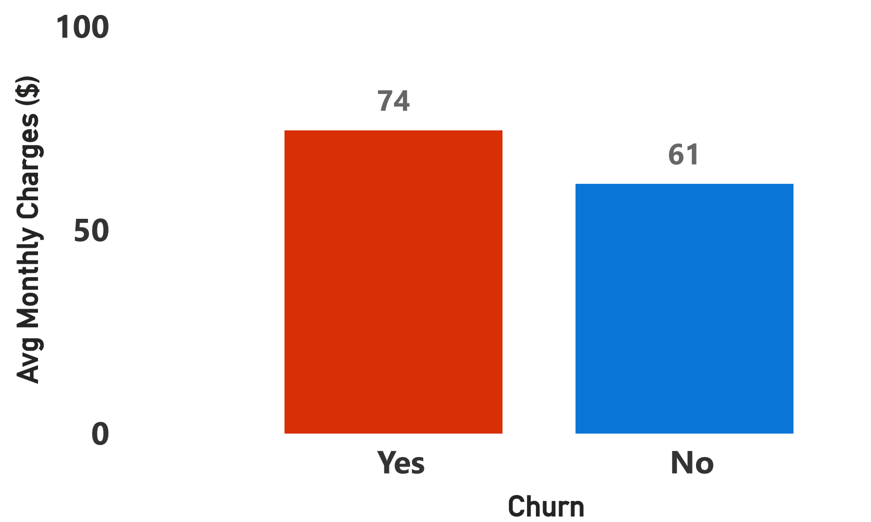
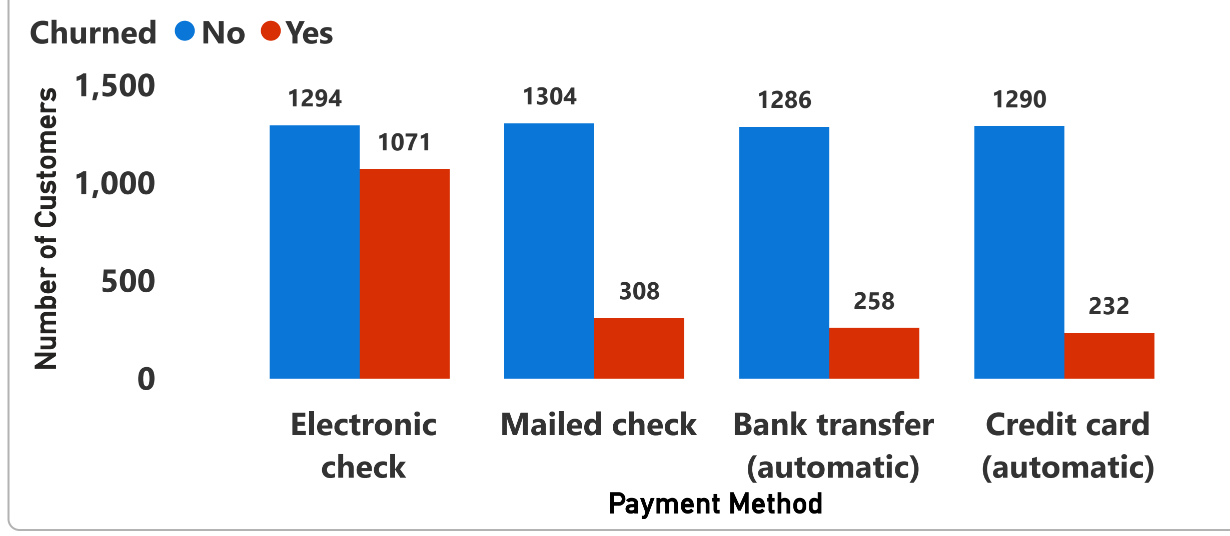
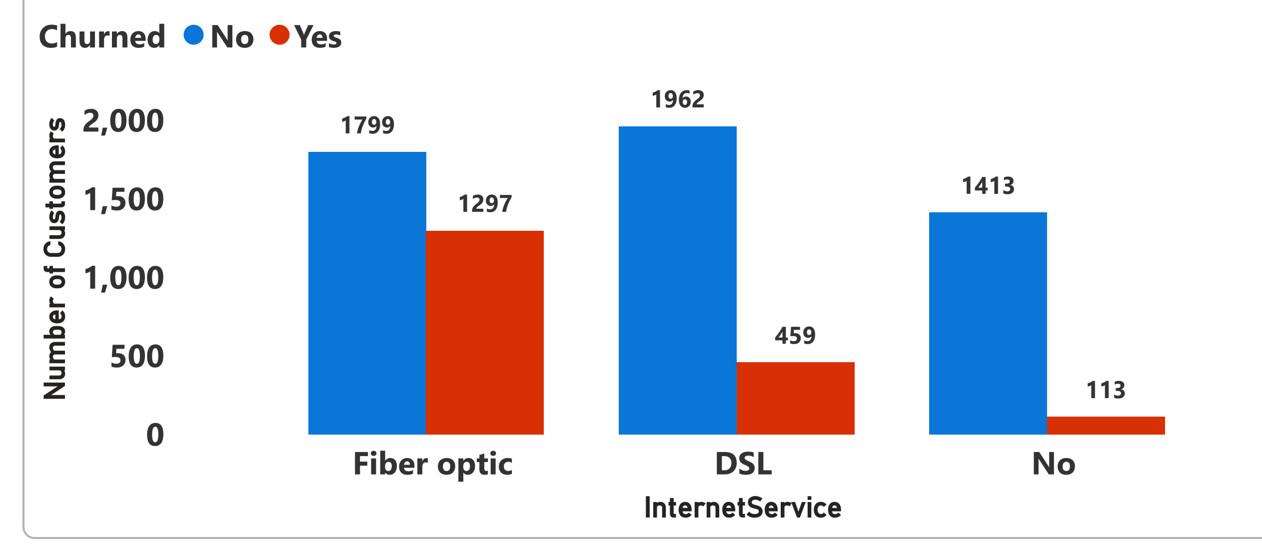
Average Monthly Charges by Churn



Churn by Payment Method



Churn by Internet Service



KEY INSIGHTS

- Month-to-month customers showed the highest churn rates.
- Most churn occurred within the first year of subscription.
- Higher monthly charges were associated with increased churn likelihood.
- Customers using automatic payment methods demonstrated stronger retention.
- Fiber optic internet users exhibited higher churn compared to DSL and No internet users.

RECOMMENDATIONS

- Encourage customers to migrate from month-to-month to long-term contracts.
- Improve onboarding experience to reduce early-stage churn.
- Offer competitive pricing and loyalty discounts to high-paying customers.
- Promote automatic payment methods to improve retention.
- investigate service quality issues affecting fiber optic customers
